Linked Lists

➤ **linked list**

- a sequence of nodes in which each node but the last contains the address of the next node

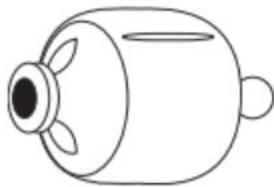

➤ **empty list**

- a list of no nodes
- represented in C by the pointer `NULL`.

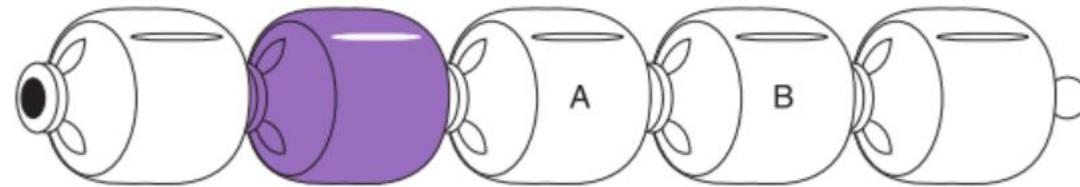

➤ **list head**

- the first element in a linked list

Figure Children's Pop Beads in a Chain

Pop bead

Chain of Pop beads

current volts linkp

A C \0	115	
--------	-----	--

current volts linkp

D C \0	12	
--------	----	--

current volts linkp

A C \0	220	/
--------	-----	---

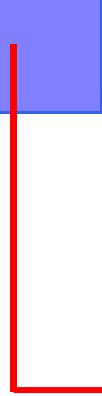

Figure Multiple Pointers to the Same Structure

```
node_t *n1_p, *n2_p, *n3_p;  
  
n1_p = (node_t *)malloc(sizeof(node_t));  
strcpy(n1_p->current, "AC");  
  
n1_p->volts = 115;  
  
n2_p = (node_t *)malloc(sizeof(node_t));  
strcpy(n2_p->current, "DC");  
  
n2_p->volts = 12;  
  
n3_p = n2_p;
```

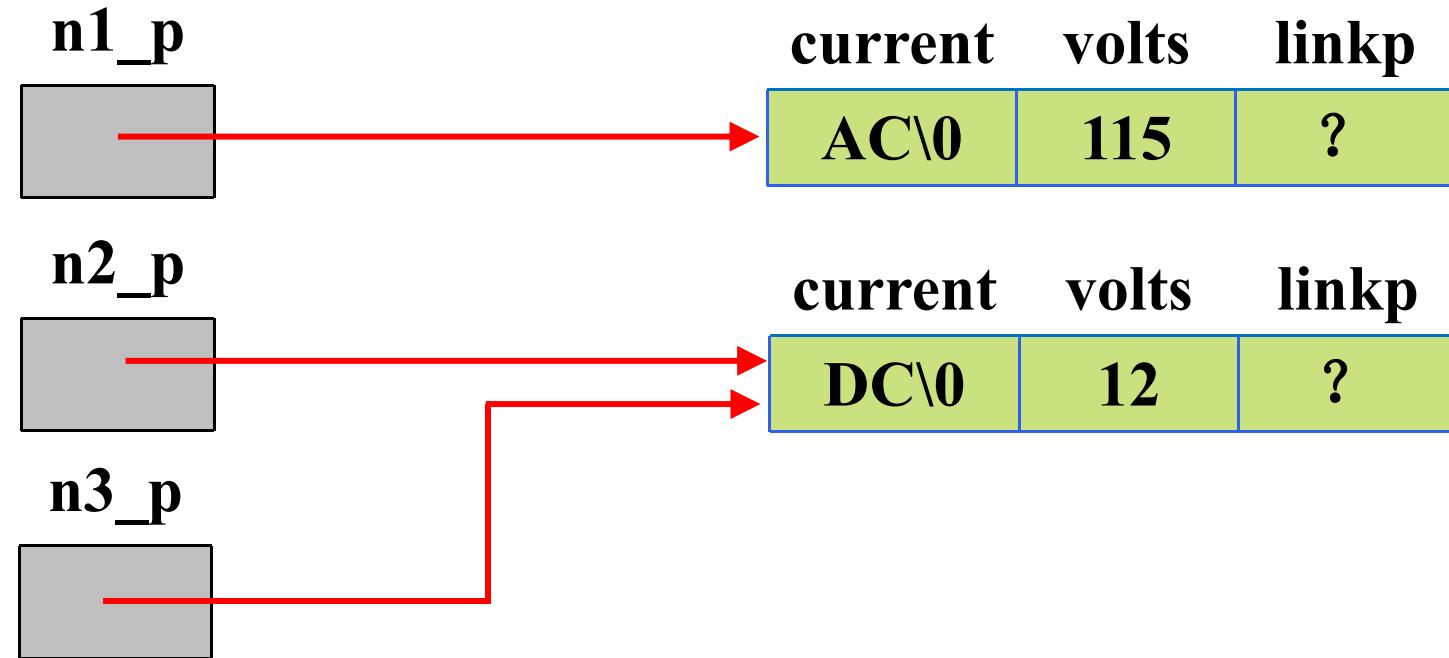

Figure Linking Two Nodes

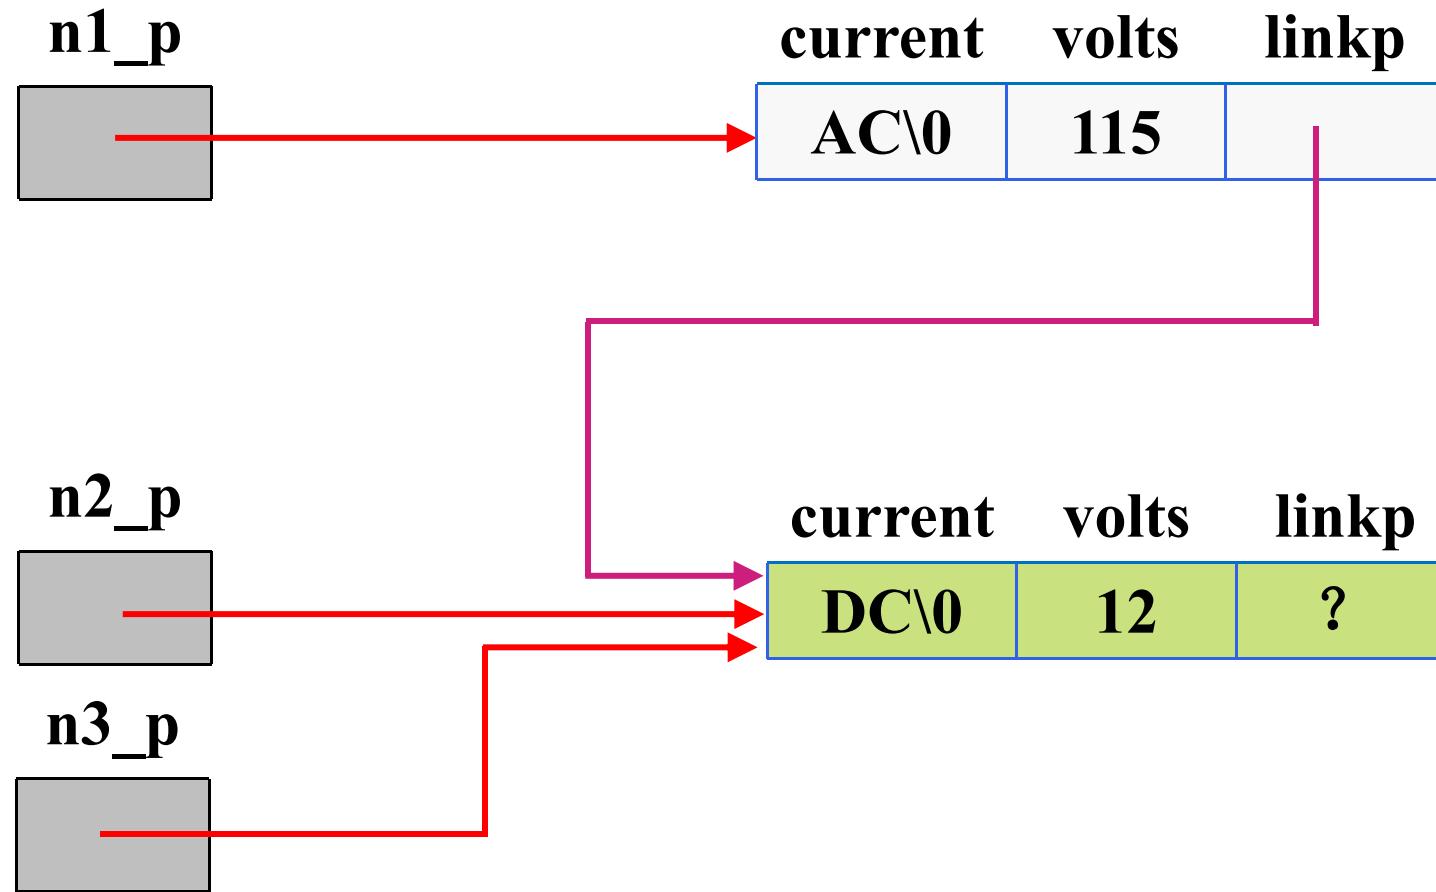

Table Analyzing the Reference n1_p->linkp->volts

Section of Reference	Meaning
n1_p->linkp	Follow the pointer in n1_p to a structure and select the linkp component
linkp->volts	Follow the pointer in the linkp component to another structure and select the volts component.

Figure Three-Node Linked List with Undefined Final Pointer

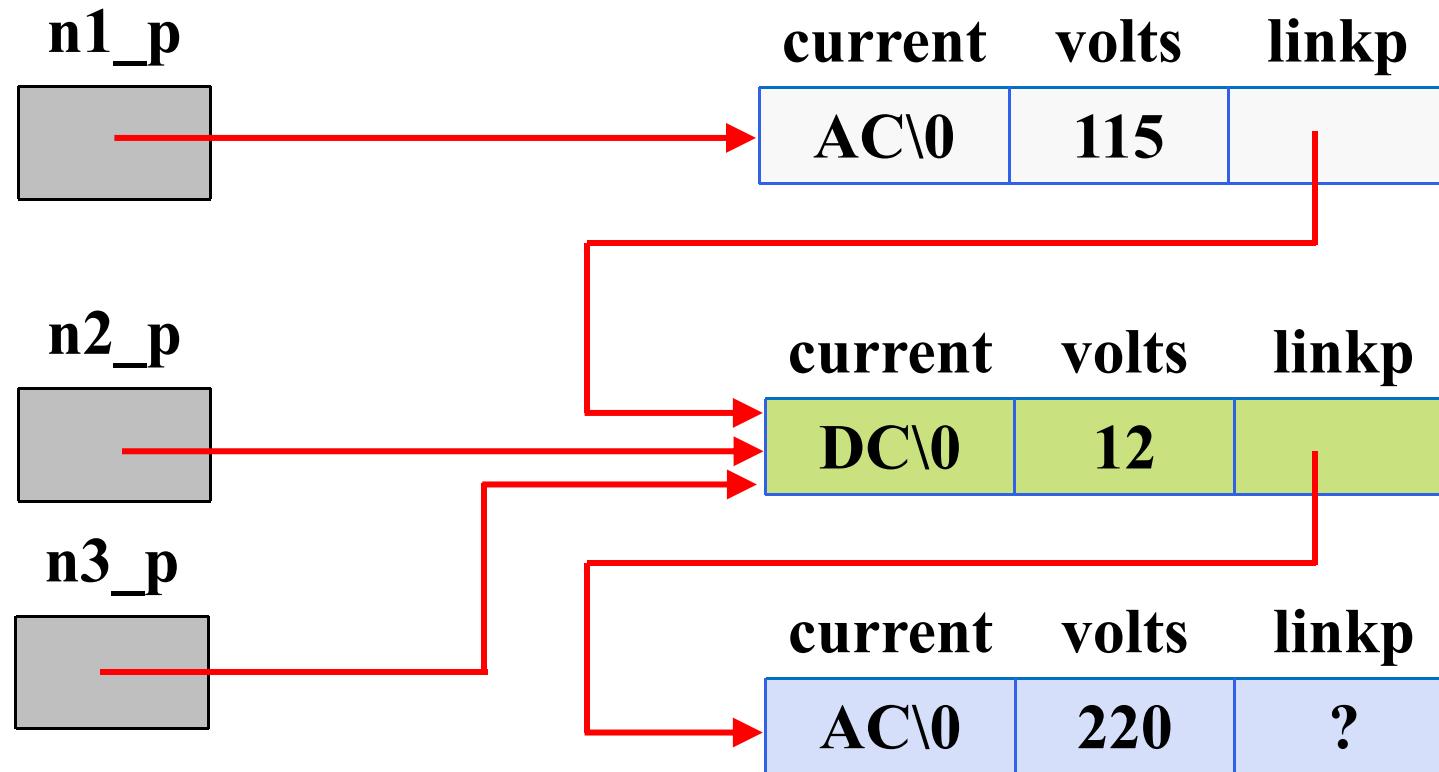

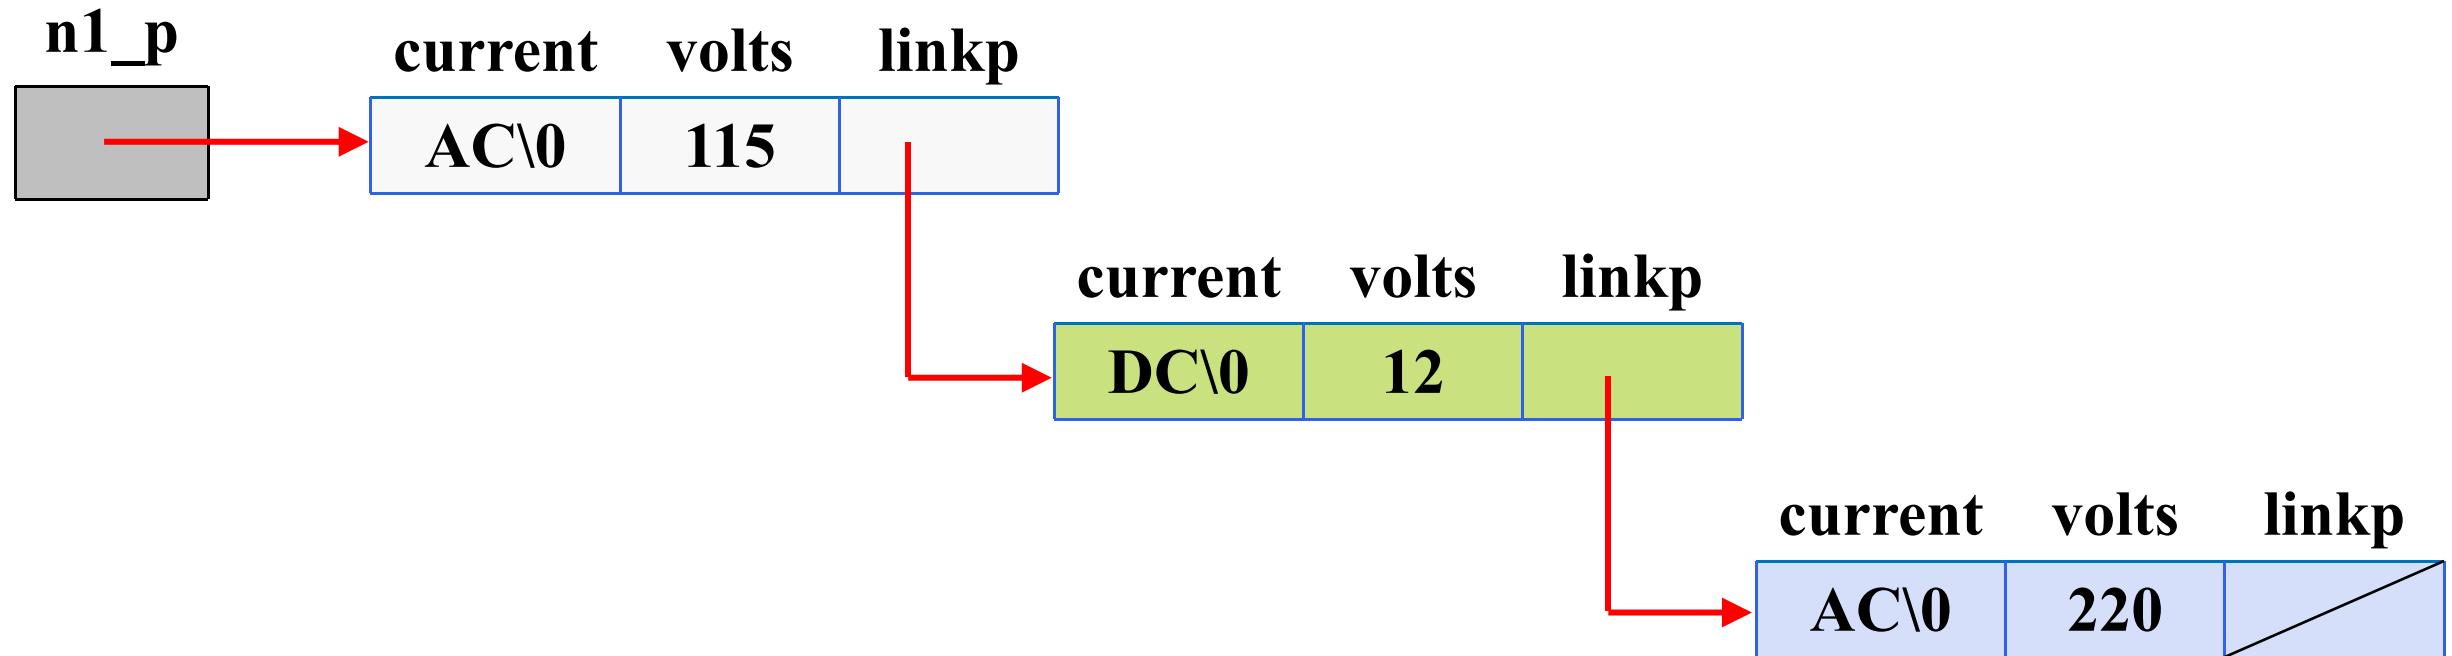

Figure Three-Element Linked List Accessed Through n1_p

```
digit* create_new_digit(int d) {  
    digit* new = (digit*) malloc(sizeof(digit));  
    new->d = d;  
    new->next = NULL;  
    return(new);  
}  
  
int main(void) {  
    digit* head;  
    head = create_new_digit(1);  
    head->next = create_new_digit(2);  
    head->next->next = create_new_digit(3);  
}
```

Stack memory

```
main  
    digit* head: ??  
  
create_new_digit  
    int d: 1  
    digit* new:
```

1 | NULL

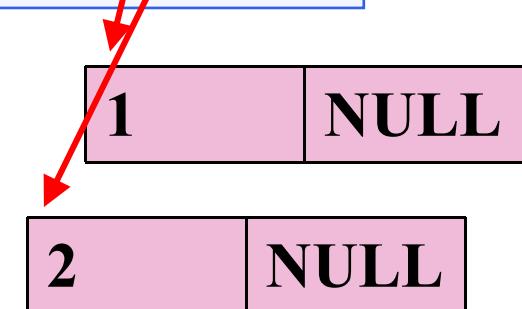

Heap memory

```
digit* create_new_digit(int d) {  
    digit* new = (digit*) malloc(sizeof(digit));  
    new->d = d;  
    new->next = NULL;  
    return(new);  
}
```

```
int main(void) {  
    digit* head:  
    head = create_new_digit(1);  
    head->next = create_new_digit(2);  
    head->next->next = create_new_digit(3);  
}
```

Stack memory

```
main  
digit* head: /  
create_new_digit  
int d: 2  
digit* new: /
```

Heap memory

```

digit* create_new_digit(int d) {
    digit* new = malloc(sizeof(digit));
    new->d = d;
    new->next = NULL;
    return(new);
}

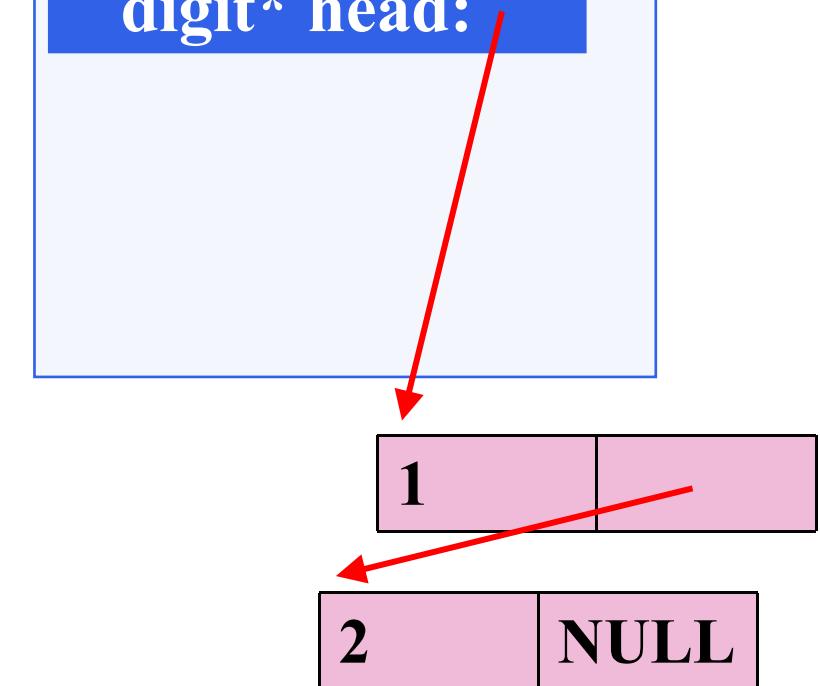

int main(void) {
    digit* head;
    head = create_new_digit(1);
    head->next = create_new_digit(2);
    head->next->next = create_new_digit(3);
}

```

Stack memory

main

digit* head:

Heap memory

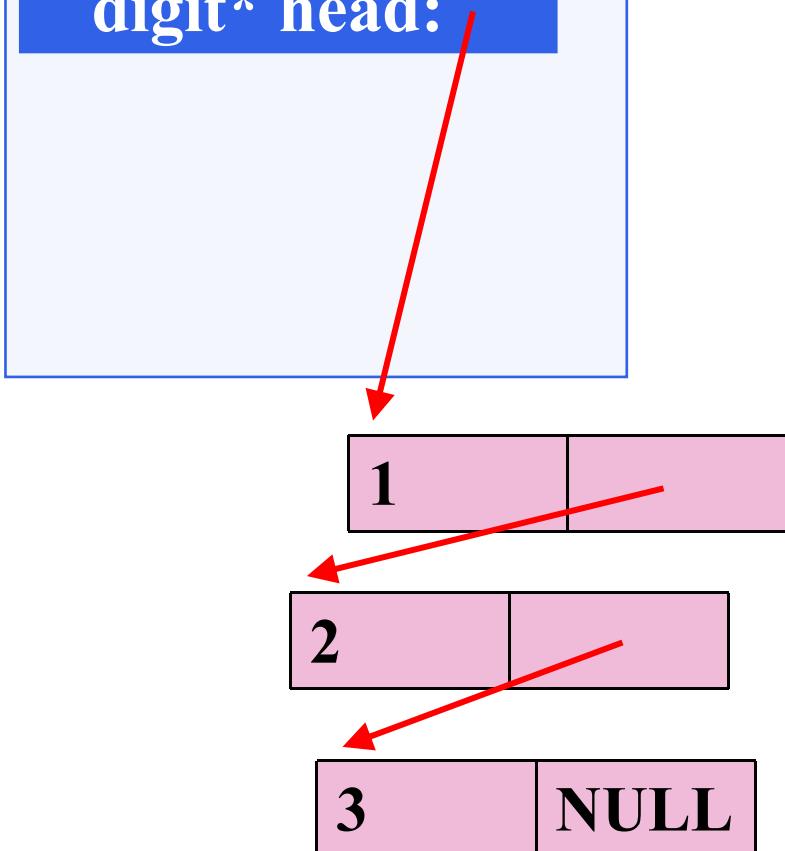

```
digit* create_new_digit(int d) {  
    digit* new = malloc(sizeof(digit));  
    new->d = d;  
    new->next = NULL;  
    return(new);  
}
```

```
int main(void) {  
    digit* head:  
    head = create_new_digit(1);  
    head->next = create_new_digit(2);  
    head->next->next = create_new_digit(3);  
}
```

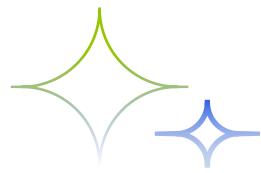

Stack memory

main

digit* head:

Heap memory

THE END
